

스프링 - Controller 04

실습 JS 사용

```
<body>
  <form action="/getToWork" name="checkInForm">
    <input type="text" name="name">
    <br>
    <button>출근</button>
    <button type="button">퇴근</button>
  </form>
</body>
<script>
  let form = checkInForm;
  let button = document.querySelector("button[type='button']");

  button.addEventListener("click",function()){
    form.setAttribute("action","/leaveWork");
    form.submit();
  }
  console.log(form.getAttribute("action"));
</script>
```
